### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Krul on 10-19-2005.

The application has been amended as follows:

*In the claims:*

Claim 1, line 12, after "surfaces" insert --extending the entire axial length thereof and--

Claim 5, line 5, after "are" insert --a-- and after "monolithic" insert --elastomeric--;

Claim 5, line 9, after first recitation of "surfaces" insert --extending the entire axial length thereof and--

Claim 9, line 3, delete "is"; and

Claim 11, line 4, delete "planer" and after "surfaces" insert --extending the entire axial length thereof and comprising planer surfaces interconnected between curved surfaces--.

2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, JP207 in view of Mizuno (US#6443678), in view of Bodin (US#6146076), and further in view of GB379 discloses all of the limitations except for the plurality of external surfaces of the internally threaded member extending the entire axial length thereof and defining a plurality of planer surfaces interconnected by curved surfaces. Moreover, GB379 teaches the internally

threaded member includes a hexagonal shaped periphery, and thus only a plurality of external planer surfaces extending the entire axial length thereof. Although Hunckler (US#3489312) teaches an internally threaded member having a plurality of external surfaces defining planer surfaces interconnected by curved surfaces (see Fig. 5, col. 3, lines 21-26), the external surfaces exist only on a flange portion thereof and do not extend the entire axial length of the internally threaded member. Thus, it would not have been obvious to one of ordinary skill in the art to further modify GB379, in view of the teachings of Hunckler, such that the plurality of external surfaces of the internally threaded member extended the entire axial length thereof and defined a plurality of planer surfaces interconnected by curved surfaces. Claims 5 and 11 include the allowable subject matter discussed above and are therefore allowable for at least the same reason(s).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L. Miller whose telephone number is (571) 272-7068. The examiner can normally be reached on Tuesday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J. J. Swann can be reached on (571) 272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
